

KYLE POWELL

Sarnia, On • 519-402-9156 • powelldev91@outlook.com • <https://kyle-p.dev>

Summary

Full-stack developer with hands-on experience building and deploying production-ready web applications using JavaScript, and AWS. Developed MERN-stack projects featuring authentication, role-based access control, real-time communication, and RESTful APIs. Experienced working in Agile teams through co-op projects and focused on writing clean, maintainable code to solve practical problems.

Technical Skills

Languages: JavaScript, Java, SQL, Non-SQL, Python, C#

Frameworks/Libraries: React, Node.js, Express, .NET, Spring Boot, Next.js, Tailwind, Bootstrap

Web & Infrastructure: Nginx, REST APIs, WebSockets

Cloud & DevOps: AWS (EC2, S3, IAM), GitHub, CI/CD, PM2, Linux, Agile/Scrum

Tools: Git, Figma, Postman

Projects

Project Manager (<https://projectmanager.kyle-p.dev>)

Full-stack MERN application for managing projects, tasks, subtasks, and time tracking.

- Designed and implemented a **3-tier architecture** (React frontend, Express/Node API, MongoDB).
- Built **secure authentication** with encrypted passwords and protected routes.
- Implemented **role-based access control**, allowing project owners to assign different permissions to collaborators.
- Developed RESTful APIs to manage projects, tasks, and time logs, including sorting by priority, date, and status.
- Created **project analytics** using aggregated data (total time spent, completed tasks, duration in days).

Chatty App (<https://chattyapp.kyle-p.dev>)

Real-time MERN chat application using Socket.IO and WebSockets.

- Built **real-time messaging** with Socket.IO, supporting public rooms, private rooms, and 1-on-1 direct messages.
- Designed MongoDB schemas to **persist messages and conversations**, enabling cross-device chat history.
- Managed WebSocket events for joining/leaving rooms, message broadcasting, and live updates without page refresh.
- Integrated the real-time layer with REST APIs for user and message management.

Army App (<https://armyapp.kyle-p.dev>)

Data-driven web app for managing tabletop game units.

- Built a fast, searchable UI for selecting and viewing game units from uploaded datasets.
- Structured unit data to prioritize key statistics and keywords for quick reference.
- Implemented dynamic UI highlighting to surface important rules and descriptions.

Experience

Software Developer (Co-op) — IMA Ltd

April 2023 – August 2023

- Built Node.js scripts to parse, cleanse, and normalize client data, automating validation and reducing manual entry.
- Enhanced an internal tool to dynamically recognize new attributes and keywords as data requirements evolved.
- Exported cleaned data into database-ready formats, improving consistency and processing efficiency.

Web Designer/Developer — Red Ray Construction

May 2022 – August 2022

- Designed and deployed a responsive business website, ensuring cross-browser and cross-device compatibility.
- Configured domain services and set up business email infrastructure for the company.
- Integrated front-end components and delivered a polished, client-ready web presence.

Various Roles – Manager, Cook, Janitor

2015 – 2025

Demonstrated reliability, team leadership, and accountability in fast-paced service roles. Gained experience in scheduling, conflict resolution, monthly budgeting, and multitasking — skills transferable to collaborative software teams.

Education

Diploma in Computer Programming

Lambton College, Sarnia On

September 2021 – August 2023

- Relevant coursework: Java, JavaScript, HTML, CSS, SQL, Python, C#, Node.js, MongoDB
